Please consider donating to this wonderful event!! Thanks to those that have already donated!
- Oct. 25-28 Birthday Lunches
- Oct. 29 Fantastic Friday—
Character Dress up Day
- Nov. 15-16 NO SCHOOL

2 Year Old Pandas

“Houses”

This week was a busy week for the 2's. They continue to amaze us every day! We continued with the topic "Houses". We talked about different types of houses in circle time; tee-pees, boathouses and apartments. The song "Some People Live in Houses" was everybody's favorite! The children were involved in various activities to help them better understand this concept. They enjoyed building a tee-pee in their classrooms, painting a skyline of apartments and lacing up the sides of boats. Playing with boats in the water was a great way to end this week!

3 Year Old Rabbits

“B” is for Butterflies...

Butterflies and bees, ba ba ba...and this is how we write it – “down, around, around.”

Bb is for butterfly, bee, baby and bib. The 3 year olds are having a wonderful time learning the letter B. Different activities, arts and crafts were given, wherein the children had a great chance to explore in four different ways of learning. Cheers and a hurray to 3 year olds class for making a good start to learning the alphabet!

4 Year Old Tigers

Neighborhood

The 4-year-old class has just begun to understand that there is a beautiful place to explore outside our home and school. As we start to learn about our community, we are finding out that different jobs and duties are divided amongst various groups of people. Fire stations, police stations, post offices, and other places of service seem to be our topics of discussion over the month. In addition to that, we are reading stories and singing songs in class about the above topic, and the students are also involved in making their own 3D representation model of their interpretation of the neighborhood. Last but not least, to bring life to the above topic, the children will further explore their neighborhood and surroundings by taking a short walk and learning about their own ECC backyard.
