December's Success Orientation: Responsibility

QSI considers the Success Orientations to be primary indicators of future success in education, employment, and life in general. We work daily with our students to promote their growth in areas of character. This month students have focused on Responsibility. Even young children can take responsibility for tasks like cleaning up, feeding pets and getting school work ready for the next day. At school, students demonstrate responsibility by completing work on time, using classroom equipment properly and bringing homework to class. Please take time to talk to your child about what responsibilities they have at home as well as school, and please thank them for being responsible in their daily lives!
